General Admissions Requirements
- Complete online application: www.ceu.edu/apply
- Proof of English proficiency
- Letters of recommendation
- Curriculum vitae

Program Entry Requirements FOR THE DOCTORAL PROGRAM
- General CEU admissions requirements
- Master’s degree in any discipline related to Cognitive Science
- Research proposal

WHY CEU?
- 52 English-language degree programs.
- Students and faculty from some 100 countries. Alumni on 6 continents in top positions. Accredited in the U.S. and Hungary. 8:1 student/faculty ratio.
- Based in Budapest, the heart of Europe.

SCHOLARSHIPS / CEU is committed to attracting talented students and scholars from around the world and provides generous merit-based scholarships available to students from any country. Doctoral scholarships include a full tuition waiver and a generous stipend for housing and living expenses. Learn more at www.ceu.edu/financialaid.
**Doctor of Philosophy in Cognitive Science**

This research-based, interdisciplinary program offers specialization in the fields of social cognition, cognitive development, and formal and biological models of perception and learning. Students may take courses in cognitive psychology, philosophy of mind, cognitive anthropology, visual perception and computational modeling. They receive practical research training in methods, experimental design and data analysis in the laboratories of departmental faculty members.

**CAREER PATH**

Our program equips students with skills for successful careers in academia and other research-oriented sectors, meeting the growing demand for experts in social and computational cognitive science. They may also find positions at organizations that appreciate how institutional design and governance benefit from a better understanding of the cognitive bases for decision-making.

---

**DEPARTMENT OF COGNITIVE SCIENCE**

The Department of Cognitive Science at CEU concentrates on social and biological aspects of human cognition: how learning, processing and sharing information about and with others takes place, and how computational models of human cognition can be realized in the brain. Students and faculty undertake interdisciplinary research drawing on psychology, neuroscience, philosophy, mathematical modeling, linguistics and the social sciences.

**QUICK FACT**

The department hosts many research projects funded by the European Research Council (ERC) that address cognitive development, social cognition and cultural transmission. PhD students take part in cutting-edge research in excellent new research facilities including state-of-the-art technology for infant studies, eye and motion tracking, music, EEG and NIRS.

**Select Areas of Research**

- Behavioral economics
- Cognition and culture
- Cognitive development
- Cooperation
- Computational models
- Embodied cognition
- Infant social cognition
- Joint action
- Learning and memory
- Social cognitive neuroscience
- Statistical learning
- Visual perception

**LAURA SCHMITZ**

*GERMANY*

"The Department of Cognitive Science at CEU provides great research and study facilities and is led by distinguished scientists who are down-to-earth, easy to approach and always open to discussion. It offers research opportunities on a broad range of topics within an interdisciplinary framework and brings together students from all over the world. But most importantly, it is a place where you can meet and work with inspiring people in a friendly environment."
